Yurii Linetskyi

REACT FRONT-END DEVELOPER

About me ⓘ

I'm a young and ambitious React Front-end developer, I'm 19 years old, I was born in Ukraine but now live in Norway.

I have been self-educating as a Front-end developer with commercial experience for over a 2 years.

I develop web interfaces.
I customize web browser compatibility.
I ensure optimal performance of websites.
I interact with the backend (API).

And I am constantly improving my skills by following new technologies, frameworks, and trends in web interface development. I am constantly learning new development tools and methods to improve my skills and work efficiency.

The main goal as a front-end developer 🎯

My main goal as a front-end developer working with React and Next.js is to create a user-friendly, intuitive interface, develop scalable components, increase performance and efficiency, provide responsive design and improve web application loading speed, and successfully integrate them with backend systems and APIs.

I also want to get into a cool and friendly company where I will increase my experience and improve my skills as a Front-end developer and become the best in this field.

Skills ⚙️

HTML & Css/Sass — Advanced	React.js — Intermediate	Sanity — Intermediate
JavaScript — Intermediate	Next.js — Intermediate	React Native — Intermediate
TypeScript — Intermediate	Redux/Zustand — Intermediate	PostgreSQL — Intermediate
Prisma — Upper Intermediate	Mantine/Shadcn UI — Intermediate	TailwindCSS — Upper Intermediate

Education 🎓

Complete secondary of education, Uman Lyceum No. 1
2012-2023

Studying at Hamar katedralskole for the specialty Information technology
2025-2029

Work Experience 💼

(Low-Code/Code) Full-stack Developer
UDEX · Full-time - Remote
Aug 2023 – present · 2 years 4 months

(Low-Code/Code) I create interactive user interfaces. I create a modern, interactive and user-friendly interface that provides an excellent user experience through the effective use of HTML, CSS, JavaScript, React, Next.js.

I implement responsive design. I optimize web applications to work on different devices and screens, while maintaining high performance and loading speed through the effective use of responsive design.

API integration and state management: Provide seamless integration with APIs for data acquisition and processing, as well as effective application state management, enabling applications to run quickly and reliably.

Create reusable components
Working with the backend

Optimize performance: I improve frontend performance by optimizing component rendering, data caching, lazy loading, and other techniques that reduce load times and improve Lighthouse performance.
Improve and maintain code
