

Yurii Linetskyi

FRONTEND-FOCUSED FULL-STACK DEVELOPER

CORE SKILLS

Frontend

React · Next.js · TypeScript · JavaScript ·
React Native · Expo · Tailwind CSS ·
shadcn/ui · AG Grid

Backend & Data

Node.js · Express · PostgreSQL · Prisma ·
Supabase · Neon · REST APIs · IndexedDB
· Dexie

State & Forms

TanStack Query · Redux · Zustand · React
Hook Form · Zod

Auth, Integrations & Delivery

NextAuth · OAuth · JWT · Stripe · AI
integrations · Git · GitHub · Vercel · Bubble

PROFESSIONAL STRENGTHS

◆ Product ownership

Own features end to end from requirements
and design through implementation, testing
and delivery.

◆ Performance engineering

Diagnose bottlenecks across UI, data flow
and backend to improve scale, latency and
reliability.

◆ Reliable delivery

Turn evolving business requirements into
maintainable, production-ready solutions.

PROFESSIONAL SUMMARY

Frontend-focused full-stack developer with 3 years of commercial experience delivering SaaS products and data-heavy workflows. Strong in React, Next.js and TypeScript, with hands-on ownership across backend APIs, PostgreSQL, authentication, Stripe, AI integrations and production performance. Built and optimized high-volume data workflows processing up to 300k records.

EXPERIENCE

Frontend-Focused Full-Stack Developer

Aug 2023 - Present

UDEX

Remote | Ongoing project basis

Commercial SaaS development across frontend, backend workflows and data-heavy interfaces. Collaboration continues on an on-demand project basis.

- Re-architected a bulk data workflow handling 150k-300k records by moving intermediate staging and transformation to IndexedDB/Dexie, reducing server/database load and processing latency.
- Optimized high-volume AG Grid interfaces with row virtualization, batched operations and client-side persistence to keep bulk editing and validation responsive.
- Delivered production frontend and full-stack features using React, Next.js and TypeScript.
- Built dashboards, complex forms, role-based/API flows and backend integrations for authentication, Stripe and AI-powered features; debugged production issues with remote teammates.

PRODUCT WORK

Founder & Full-Stack Developer

Ongoing

KantinApp - Independent Product

Hamar, Norway

Multi-school canteen platform for students and administrators.

- Built an Expo mobile app and Next.js admin/backend with PostgreSQL and Prisma.
- Implemented role-based access, weekly menu workflows, voting, analytics, push notifications and offline-ready flows.
- Own product architecture and delivery end to end; currently running a pilot at Hamar Katedralskole.
- Repository: github.com/dipSyxx/KantinApp

EDUCATION

Information Technology

2025 - Present

Hamar katedralskole

Expected 2029 | Hamar, Norway

Vocational programme focused on software development, IT operations,
networking and practical project work.

Secondary Education

2012 - 2023

Uman Lyceum No. 1

Uman, Ukraine
